The Best In Practice

Gracey Curettes

Gracey curettes are area-specific curettes with blades having a single cutting edge, offset at 70° to the shank, to provide a perfect working angulation to the tooth surface.

Learn more about our Gracey Curettes.

Standard Gracey Curettes

Standard Gracey Curettes allow for deep scaling, root planing and periodontal debridement. Gracey Rigid curettes have thicker, stronger and less flexible shanks than Standard Graceys to allow for removal of moderate to heavy calculus. Gracey Extra Rigid Curettes are ideal for tenacious calculus removal. Standard, Rigid and Extra Rigid Gracey Curettes all have identical blade dimensions.
