

Wood wedges

Top Swiss quality, splinter-free interdental wedges

- Anatomical shape, rounded tip
- Small size (XS, pinky) for paediatric dentistry
- Big size (XL) for periodontology
- Orange Wood Wedges - the most used size for your daily work

Square end
for a secure grip

Rounded tip to
prevent gingival trauma

Concave sides perfectly adapt
along the entire cervical margin in the
interdental space

Achievement of perfect contact points

Pinky 11 mm, the smallest wood wedge ever - ideal for paediatric dentistry
